INK SOLUTIONS GUIDE

Solutions for every challenge

with HP products, you have options!

COATED STOCK INK FAMILY

These stocks come from the paper mill with a coating. There are many variations of coated stocks, some of which are obviously coated with a high-gloss finish, and some of which aren't so obvious, like matte or satin stocks.

	#	Brand	Name	List Price *	Notes	Item Number
Recommended	1	FlexPrint	EB	\$33.25	Outstanding for matte and glossy coated stocks; excellent darkness, decap, and ink yield; very cost effective (and still dark) at 200 dpi.	5740
	2	HP	Versatile	\$29.00	Works well on coated stocks with a dryer; doesn't have great decap, so it's better for larger runs with fewer stops and starts.	2200
	3	FlexPrint	SF	\$34.00	Fastest drying ink on basic stocks; not as dense as FlexPrint EB, but dries well at fast speeds, even on matte and glossy stocks.	5659

Additional options available. Go to www.add-jet.com or call 440.688.4092

UNCOATED STOCK INK FAMILY

These stocks have no coating from the mill. They are usually porous, and require ink formulas that absorb into the stock and then dry quickly so the ink doesn't bleed (spread).

	#	Brand	Name	List Price *	Notes	Item Number
Recommended	1	HP	45A	\$32.90	Basic ink for uncoated stocks; available only in 10-packs.	5550
	2	FlexPrint	EB	\$33.25	Outstanding for uncoated envelopes; excellent darkness, decap, and ink yield; very cost effective (and still dark) at 200 dpi.	5740
	3	HP	Versatile	\$29.00	Works well on uncoated stocks with a dryer; doesn't have great decap, so it's better for larger runs with fewer stops and starts.	2200

Additional options available. Go to www.add-jet.com or call 440.688.4092

AQUEOUS STOCK INK FAMILY

These stocks may or may not have been coated from the paper mill, but they have been over-coated with a post-production aqueous finish at the commercial printer. The water-based coating creates a nice finished product that is usually shinier, smudge-resistant, scratch-proof, and fingerprint-proof, but that coating is more challenging to inkjet. Aqueous coatings require specific inks from the Aqueous Ink Family, as well as a dryer.

	#	Brand	Name	List Price *	Notes	Item Number
Recommended	1	FlexPrint	AC Plus	\$36.25	All-around ink that prints well on aqueous (with a dryer); works on most other applications; good decap, print quality, and ink yield.	5745
	2	FlexPrint	AC	\$35.75	Aqueous ink formula (works with a dryer) that also works on basic stocks; good ink yield and print quality.	5674
	3	FlexPrint	Aqueous	\$38.50	Very dark ink that prints well on aqueous coatings (with a dryer); doesn't have great decap, so it's better with few stops and starts.	5152

Additional options available. Go to www.add-jet.com or call 440.688.4092

SPECIALTY/PLASTIC/UV COATED STOCK INK FAMILY

Most specialty stocks are very challenging to inkjet because of the complex coatings or because of the material itself. Specialty stocks usually require a solvent-based ink formula. Because of the alcohol content, solvent inks tend to dry quickly on almost anything. Even with solvent inks, sometimes a dryer may be needed to make the ink adhere more permanently to the stock.

	#	Brand	Name	List Price *	Notes	Item Number
Recommended	1	FlexPrint	Unlimited	\$37.50	Very dark solvent-based ink for UV coatings, varnishes, plastics/PVC, and packaging industry; dries almost immediately.	6027
	2	HP	2580 Solvent	\$53.95	Works on most specialty stocks, especially on foils and packaging materials; has best decap of solvent inks for specialty stocks.	6062

CARDBOARD/CORRUGATED/LUMBER INK FAMILY

Uncoated Cardboard and Uncoated Corrugated material, which are NOT the same thing, tend to require inks that are somewhat water fast. Lumber, laundry tickets, and uncoated labels could also fit into this family.

	#	Brand	Name	List Price *	Notes	Item Number
Recommended	1	FlexPrint	PK	\$33.75	Very good ink for corrugated stocks; very good decap and outstanding ink yield; can be effective in waterfast applications.	5833
	2	FlexPrint	AC Plus	\$36.25	Very good ink for corrugated stocks; very good decap and outstanding ink yield; can be effective in waterfast applications.	5745
	3	FlexPrint	EB	\$33.25	Very dark ink for basic coatings, uncoated, and corrugated stocks; great decap, drying time, and ink yield.	5740
